Blame Public Service.

The abolishment of the Bloomfield avenue grade crossing of the Lackawanna Railroad was the principal matter of business at the Board of Freeholders' meeting Thursday. The Public Service Corporation is blamed for the delay in carrying out a plan arranged a year ago, under which the railroad company and Public Service Corporation and the Board of Freeholders were to jointly bear the expense.

County Counsel Munn, in speaking on the matter, said: "The traction company at first seemed willing to take up the proposition, but they have not. They have tried to use the situation to inforce the accomplishment of their own good elsewhere. I do not see why the Montclair people are pounding the Board of Freeholders. We have agreed to take the matter up and pay what is certainly a fair share. I cannot see why this further application to the board should be made."

Tax Legislation.

Now that the Legislature has adjourned Boards of Assessors in the municipalities of this State will have an opportunity to learn to want extent the numerous bills affecting taxation will effect the work of the assessors. The Legislature made a new maximum tax rate law and the State Board of Taxation will probably issue instructions to local boards as to its provisions and their applications.

Board of Trade Banquet.

The banquet committee of the Board of Trade, of which Peter J. Quinn is chairman, has extended an invitation to Governor Stokes to speak at the dinner, which will be held April 30th. If the Town Council will permit, the affair will be held in the new firehouse in Bloomfield avenue.

Italians Angry.

The failure of the Council to take any action towards improving the streets in the Silver Lake section has led to a great deal of dissatisfaction in that locality.

Arctic Mosquitoes.

The presence of mosquitoes in myriads within the bare, uninhabited arctic circle is surely in some degree a mystery. The mosquito is a bloodsucker, but in these unvisited plains he is for the most part, and of strict necessity, a vegetarian. A few birds excepted (and the birds are furnished with impervious feathers), there is no local life whatever. The Lapp in summer drives his reindeer to the sea, and no native crosses the field if he can help it. Yet in this region, "seemingly the most unsuitable for its effective working," the mosquito flourishes, "a primeval and enduring curse, inexplicably developed to its utmost."—London Chronicle.

Land of Surprises.

New Zealand is not strictly contiguous to or a part of Australia, as many seem to imagine, there being a slight difference of some 1,700 miles between them. Things go by contraries in the "land of the kangaroo." The farther north you travel the hotter it is—125 degrees in the shade in Queensland. Lignum vitae, which sinks in other waters, floats in Australian waters. The Christmas dinner is eaten in Melbourne and Sydney when it is over 100 degrees in the shade.

Have your lawn mower put in shape by S. P. Townsend through Fronapfel Bros., Bloomfield Centre.—*Adv.*
